

To FCC,

I am making a complaint, that is more of a call to action, a request and/or a plea that FCC maintains net neutrality. The reality of no net neutrality is undemocratic. It would be impeding on our freedoms to allow companies to control which websites we use, therefore controlling the content we see. It is a dangerous move in the direction of authoritarian corporation control of public information. I beg you to protect internet neutrality.

Best,  
Rachel Gross
